Carbon Filtration System

Rocket / Agent Processing

Total number of GB-filled rockets destroyed this period	522
Total number of GB-filled rockets destroyed to date	70,602
Total number of GB-filled bombs processed this period	13
Total number of GB-filled bombs processed to date	1,895
Pounds of agent destroyed this period	8,815
Pounds of agent destroyed to date	1,151,872
Percentage of GB rockets destroyed to date	77.2
Percentage of GB bombs processed to date	77.5
Percentage of total agent tons destroyed	15.49
Number of igloos emptied	34

UMCDF Operations

- Safety is number one at UMCDF: employees have worked 579 days since the last lost-workday accident (Oct. 22, 2004).
- Completed processing all MK-94 (500 lb.) GB-bombs May 18. A total of 27 bombs were drained of chemical agent and thermally decontaminated, the last MK-94s in the national stockpile.
- A violent storm May 19 knocked power out across the Depot and UMCDF. While no structures containing chemical weapons were damaged, heavy winds damaged other buildings. There were no injuries and there was no indication of agent outside engineering controls.

Depot Commander Lt. Col. Donna Rutten (left) and Wendell Wrzesinski, Facility Technical Representative, stand in front of the last MK-94 GB bomb to be processed in the U.S. chemical weapons stockpile at the UMCDF May 18.

*Leading the
Way to a Safer
Future*

The Umatilla Chemical Agent Disposal Facility is safely destroying the stockpile of weapons stored at the Umatilla Chemical Depot while ensuring maximum protection for our workers, our community and our environment.

CREATING A SAFER TOMORROW
